Subject: Wastewater Complaint - South Sioux City, NE

Mike,

I received a IAQ hotline call today from Robert Baker, 712-490-3942, complaining that HCl gas is backing up from the South Sioux City, NE city sewer system into private homes and schools causing many families to move into motels and causing kids to leave schools sick. Robert says the HCl gas in the sewer system is coming from the Big Ox Energy facility which converts waste from a Tyson beef processing plant. Robert says he contacted the State, but no action has been taken.

Could you pass this information on to the appropriate person?

Steve
